

5 Powerful Power Apps Use cases

Employee Onboarding App

For a Hassle-Free Experience for New Joiners & HR Team

Streamline and customize the onboarding experience with seamless coordination, automated reminders, and alerts. Creates a personalized onboarding program comprising activities and tasks and manages onboarding teams. It can also include a dashboard to help HR track employee onboarding by monitoring progress on assigned tasks, approving completed tasks, and sending reminders and alerts.

Inspection App

For Digitizing Inspection Activity To Achieve a Paper-Less, Zero-Carbon World

Automate and digitize every possible inspection workflow, including infra, vehicle, and machinery inspection activities, & eliminate the hassle and significant time involved in compiling information on paper. It provides officials with an easy-to-use and navigates app on which they can log their activities, submit them in real-time, save time on documentation, and report quickly and seamlessly collaborates with relevant officials and agencies.

Project Management App

For the New Ways of Working in This Hybrid World

Create and manage projects in a single, consolidated space, raise approval requests, manage team & deliverables, single-click access to all relevant project repositories, automate the creation of project assets, raise and manage issues, audit project progress, and achieve always-on visibility into the progress of projects and challenges. Project managers can now stay on top of all updates and collaborate better.

Vendor Management App

For a Seamless Vendor & Contract Management

Modernize contract & vendor management, digitize submission, approval, and tracking of contracts, from forms to workflows to notifications. A single app that can be adopted by all vendors for easy access to their contracts, by employees to view status, track & approve, by integrating all the relevant departments with appropriate edit and view capabilities for a different role.

Material Procurement App

For a Faster and More Efficient Material Procurement Management

Digitize the material request process for different disciplines with options to notify relevant users, along with the real-time status of material requests, reviews, approvals, and receipts. A single source of truth for employees, contractors, and consultants. It can be used to raise a request for new material or copy existing requests for reorders. Reviewers can add comments which can be made visible to only selected groups for confidentiality and security.
