acuvate®

... where Acumen drives Innovation

Improve fleet effectiveness and delight customers every single time

Acuvate's Intelligent Fleet Management Solution is here to help.

IoT- Enabled Fleet Management From Acuvate's Digital Workplace Solutions.

Leaving fleet management for drivers' and managers' manual interventions is killing organizational growth.
Delayed deliveries, poor customer satisfaction, high operational costs, driver and vehicle safety risks, and reactive maintenance are hampering your company's reputation. Dealing with vehicular breakdowns is difficult and expensive. Unorganized methods and outdated tools lead to opaqueness on multiple- levels and cause productivity and hard dollar losses.

Are these risks worth taking?

The Fleet Management Landscape

- [41%](#) of organizations are unaware of the business outcomes possible with fleet management
- [32%](#) of fleets consider fuel expense to be their most considerable expense
- [Half](#) of American drivers operate their vehicles exhausted
- Almost a fourth of organizations report lower accident costs after implementing fleet maintenance solutions

It's time organizations woke up to the constraints arising out of siloed data and old-fashioned fleet management. Manual follow-ups from drivers and fleet managers can only offer half-baked solutions and stunt growth.

Fleet Management the Acuvate Way

To put an end to fleet maintenance issues and automate route analysis, Acuvate has launched a robust and intelligent IoT- enabled fleet management solution. It lets fleet operators track fuel consumption and route status and predict ETAs to customers.

Staying on top of preventive maintenance for every asset was never this easy. Access and update fleet information irrespective of location. Monitor driver performance, track trip progress and send alerts.

All with Acuvate's groundbreaking Intelligent Fleet Management Solution.

The perfect blend of AI & ML, data analytics, and product development capabilities deliver maintenance insights and comprehensive fleet tracking - all in one click.

Simplify Route Analysis Automate Maintenance Schedules Meet Customer's Delivery Specifications Seamlessly.

Acuvate's Intelligent Fleet Management Solution combines cognitive search capabilities, telematics, OT integrations, and fleet management functionalities to conduct inspections, aggregate sensors, plan routes, produce support plans, and generate high-priority alerts.

Organizations achieve stringent SLA adherence, real-time monitoring of assets, and modernized vehicle maintenance.

The Secret Sauce of Acuvate's Intelligent Fleet Management Solution

- Integrates Datawave telemetry to enable smooth data transition and assist fleet managers with validation checks

- Automates the approval and review process and ensures seamless fleet management

- Sends proactive notifications and reminders on delays in ETA due to weather eventualities or breakdowns

- Provides insightful Power BI reports and dashboards to address operational inefficiencies

Streamline risk assessment and achieve smooth trip management. Every day.

Intelligent Fleet Management Automate Your Way to Organizational Success and Customer Delight

Simplify fuel data connections and gain insights into cost and fuel economy

Capture all fleet data in one place

Seamlessly assign vehicles and equipment to operators

Monitor assets and trip progress with timely alerts

Consider vehicle diagnostics a child's play.

End-to-end fleet maintenance simplified with Acuvate.

Why fleet management is an investment worth making

Because monitoring vehicles in real time keeps your assets and drivers safe.Gaining real-time insights on recurring asset costs streamlines expenses.Ensuring safe driver performance builds a secure and high-performing community.Predicting accurate ETA guarantees unparalleled customer satisfaction. Preventive maintenance reduces maintenance costs and unscheduled downtime. With Acuvate's Intelligent IoT-based Fleet Management, organizations:

- Make informed decisions and get access to vehicle health-related data and maintenance logs

- Leverage AI & ML algorithms to track driver performance, idle time, drunk driving, steep acceleration and other road safety alerts

- Remotely monitor cargo, prevent thefts and meet delivery specifications and timelines

- Sync odometers and geo-location data through OBD-II and ECUs for visibility into asset locations

- Manage safety, maintenance and delay alerts in one-click

- Import fuel consumption data to prevent pilferage and waste

- Address defects in odd assets and improve performance and efficiency

Why choose Acuvate's Intelligent Fleet Management Solution

Acuvate's fleet management solution is built to boost customer satisfaction and ensure optimal fleet performance.

Over the last decade and a half, Acuvate has built robust solutions to address enterprise and the public sector's most complex problems. The company has an established presence in the APAC, North American, and European regions. Over the years, Acuvate's solutions have supported multiple Fortune 500 companies to streamline processes, ensure employee safety and productivity, gain an edge over competitors, and leverage data analytics to make failsafe decisions, often at the blink of an eye.

Eliminate fleet management issues with the perfect blend of AI & ML capabilities and IoT enablement. As a result, 100%, always-on fleet, fuel, and driver visibility and seamless user experience are no longer pipe dreams.

Fleet management was never more simple. So take the plunge with 100x confidence and see your fleet performance and organizational efficiencies skyrocket.
