Digital Twin Implementation

Contact Us →

Service Overview:

Introducing the Digital Twin service integrated with your company's data using AcuPrism and KDI Kognitwin.

Key Components:

- Creating and configuring a KDI Kognitwin SaaS setup for the customer.
- Selecting, based on customer setup and requirements, either the Databricks or MS Fabric version of AcuPrism, then installing and configuring it in MS Azure (or in the case of Databricks, on AWS or GCP) within the customer's subscription.
- Selecting an SAP ERP and Aveva PI data source from the customer and linking it to AcuPrism.
- Addressing data governance requirements.
- Arranging a laser scan (via a specialized regional company) of a relevant facility.
- Loading and configuring the laser scan into KDI Kognitwin.
- Linking KDI Kognitwin to AcuPrism to enable data exchange related to SAP and Aveva PI.
- Making SAP ERP and Aveva PI data visible within the KDI Kognitwin Digital Twin.

Item	Costs
Once off software (subscription, etc.)	Customer dependent
Once off project cost	£48K / $65K / €56K

Duration:

6-8 weeks
