Microsoft Fabric Deployment

Service Overview:

Introducing the Microsoft Fabric Data and AI Platform into your organization, including data loading, storage, and the creation of two MS Power BI dashboards.

- Providing guidance on and implementing appropriate MS Fabric configurations, including MS Azure sizing and MS Azure datacenter location, based on business plans.
- Addressing and implementing data governance requirements, including registering accounts and roles.
- Managing and executing the integration of MS Fabric with up to one data source.
- Ensuring compliance with information security standards for MS Fabric.
- Configuring the customer's SaaS subscription for MS Fabric.
- Utilizing Acuvate AcuWeave to migrate an existing database from MS Synapse, on-premise MS SQL Server, or on-premise Oracle DBMS to MS Fabric OneLake.
- Developing, configuring, and implementing two MS Power BI dashboards based on customer specifications.

Item	Costs
Once off software (subscription, etc.)	Customer dependent
Once off project cost	£53K / $72K / €62K

Duration:

6-8 weeks
